WORK EXPERIENCE

Software Engineer

Sep 2023- Nov 2024 (Part Time)
Starlabs - Prishtina, KS

- Worked with a team of experienced developers to redesign the infrastructure of a TMS (Talent Management System) increasing intern-to-hire conversion rates.
- Developed a on-platform interviewing process decreasing the time spent interviewing, and increasing the productivity of the HR team.
- Worked on the migration process of our companies internal CRM app into Vue.js/Laravel stack which in turn drastically improved high data import times.

Software Engineer

Feb 2025 (Project-Based / On-Call)
BrigadaDev- Prishtina, KS

- Helped migrate the tech stack of a warehouse/distribution company management system to React.Js/Laravel.
- Collaborated with cross-functional teams to implement new features, conduct code reviews, and ensure clean, maintainable codebases.
- Brought in on-demand for time-sensitive issues, feature rollouts, or technical troubleshooting during peak development phases.

PROJECTS

Pupill LMS

Pupill, an award-winning, scalable Learning Management System (LMS) developed in PHP to streamline the digitalization of education. Designed as a robust, multi-user platform with a comprehensive feature set, Pupill offers an effective and future-ready solution for modern schools
